

Start

```
graph TD; Start([Start]) --> CHx[CHx]; CHx --> Start;
```

A flowchart with two nodes. The top node is an oval labeled 'Start'. A vertical arrow points down from 'Start' to a rectangular node labeled 'CHx'. From the bottom of 'CHx', a vertical line goes down, then a horizontal line goes left, and finally a vertical line goes up to join the arrow between 'Start' and 'CHx', forming a loop.

CHx
